4 - Accessories / Furnishings	.7
5 - Sound system	.7
6 - Lightning	.7
7 - Video / Computer	.8
8 - Labor	.8

1. OVERVIEW

The CDU Studio is a live broadcasting studio reaching an online audience. This permanent interactive webcasting facility allows the hosting of webinars, conferences, training sessions or even to deliver an artistic performance in front of a remote audience, all while benefiting from their presence in projection with the possibility of real-time interaction. Conventional ISO recording and post-production are also among the services offered. The physical space can accommodate around fifty in-person spectators, thus facilitating 'hybrid' events.

2. OPERATION

The CDU Studio is equipped with multiple computer servers allowing access to any professionally licensed broadcasting platform (ZOOM, TEAMS, etc.). The broadcast can also be redirected to social networks and/or streaming platforms (Facebook, Youtube, Vimeo, etc.) to reach a larger audience.

The CDU holds various professional licenses and can connect thousands of people remotely without any duration limits. The research and development team ensures the maintenance of best practices and constant upgrades to maintain the highest quality in terms of event smoothness, handling different content types and broadcast aesthetics.

3. STUDIO SPACES

ADDRESS : 2083, av. Branly, Quebec, Qc, G1N 4C7, CANADA

- **CDU Studio - Virtual Amphitheater**
